

Measures to Track Progress on 2008 QCC Goals								
Goal	Subgoal/Strategy	Measure	2008	2009	2010	2011	2012	National Benchmark
1. Reduce the cost of health care.	A. Reduce the annual rise in health care costs to no more than the unadjusted growth in Gross Domestic Product (GDP) by 2012.	Rate of growth in per capita health care spending	5.7%					4.4%
	B. Promote cost-efficiency through development of a website providing comparative cost information. Develop a website that will enable consumers to compare the cost of health care procedures at different hospitals and outpatient facilities.	HCQCC has developed MyHealthCareOptions website	Site is routinely updated with information relevant to consumers					N/A
	C. Reduce health care spending by preventing the need for avoidable hospital stays.	See Goal 3 - Avoidable hospitalization measures						
2. Ensure patient safety and effectiveness of care.	A. Reduce hospital-associated infections (HAI) during FY 2008. Eliminate hospital- associated infections by 2012.	CLABSI rate						
		SSI						
		Number of hospitals reviewed by DPH infection surveyors with significant findings						
	B. Eliminate “Never Events” as defined by the National Quality Forum. Eliminate events that should never happen in hospitals, such as wrong surgery, wrong site, or wrong patient.	Number of hospitals with SRE's	65	64				
		Number of SRE's reported by hospitals	338	383				
		Selected - falls	224	199				
		Selected - surgical events	62	76				
		Selected - care management events	26	78				
		Percent of surgical patients receiving appropriate care to prevent complications	90.3%					85.3%
3. Improve screening for and management of chronic illnesses in the community.	A. Improve chronic and preventive care. Improve care of chronic diseases such as congestive heart failure, diabetes, and asthma.	Diabetes patients with HbA1c - Poor Blood Sugar Control	17.5%					28.4%
		Pediatric Asthma ED visit rate (per 100,000 population)						2330.6
		Adult Asthma ED visit rate (per 100,000 population)						1815.6
		Cholesterol management for patients with cardiovascular conditions (Cholesterol (LDL-C) - Good Control)	67.9%					59.7%
		Persistence of beta blocker treatment 6 months after a heart attack	84.2%					75.0%
	B. Reduce disease complication rates, readmission rates, and avoidable hospitalizations.	Diabetes - Avoidable hospitalization rate for patients with long-term diabetes complications (number of admissions per 100,000 population)	126.0					124.9
		White	105					N/A
		Black	273					
		Hispanic	107					
		Asthma - Avoidable hospitalization rate - adult (number of admissions per 100,000 population)	156					120.0
		White	120					N/A
		Black	336					
		Hispanic	189					
		Heart Disease - Avoidable hospitalization rate - adult (number of admissions per 100,000 population)	416					476.4
		White	436					N/A
		Black	578					
		Hispanic	198					

Measures to Track Progress on 2008 QCC Goals								
Goal	Subgoal/Strategy	Measure	2008	2009	2010	2011	2012	National Benchmark
4. Develop and provide useful measurements of health care quality in areas of health care for which current data are inadequate.	Develop processes and measures to improve adherence to patients' wishes in providing care at the end of life. Ensure that health care providers ask about and follow patients' wishes with respect to invasive treatments, do not resuscitate orders, hospice and palliative care, and other treatments at the end of life.	State status in gaining endorsement from the National POLST Paradigm Task Force	Developing program					7 states have an endorsed program
		Percent of health care settings with a palliative care program						
		Hospitals	50%					53%
		Nursing Homes/SNF						78.1%
5. Eliminate racial and ethnic disparities in health and in access to and utilization of health care; health indicators will be consistent, and consistently improving, across all racial and ethnic groups.	A. Reduce disparities in healthcare associated infections.	Where available, breakdowns of the recommended measures have been provided in their respective goal areas						
	B. Eliminate disparities in Never Events.							
	C. Reduce, and ultimately eliminate, disparities in disease complication rates, readmission rates, and avoidable hospitalizations.							
	D. Reduce disparities in screening and management of chronic illnesses.							
6. Promote quality improvement through transparency.	Promote quality improvement through development of a website and other materials providing comparative quality information.	Average monthly hits to MHCO	2586					N/A
